MESO PEEL MELANIN

Anti-photoageing and hyperpigmentation properties

Azelaic acid 20% + Resorcinol 10% + Phytic acid 6%

Azelaic Acid is effective in the reduction of melasma, post-inflammatory hyperpigmentation, plays an important depigmenting and inhibitory action against keratinocytes. It has antibacterial, anti-inflammatory and seboregolartic properties.

Resorcinol is a phenolic derivative with keratolytic and regenerating properties, it fights melanic hyperpigmentations and has a whitening effect.

Phytic Acid powerful chelator of copper that encourages tyrosinase enzyme inhibition and has a depigmenting effect.

PROFESSIONAL USE

Instructions

You have to prepare the skin properly before undergoing peeling (MESO PURE PEEL, MESO LIFT AND PROTECT or Mesococktail). It is necessary to protect the treated area with a product with a high protection factor and rich in moisturizing and elasticizing substances (MESO LIFT AND PROTECT).

STEP I

Preparation

- Cleanse the area to be treated, carefully removing makeup
- Pre-procedure cleansing solution / wipe (Meso Pure Peel)

STEP II

Meso Peel Protection

Protect sensitive areas (periocular area, lips, nasal mucosa Formula based on moisturizing and protective agents

STEP III

Meso Peel Melanin

Apply a thin layer of MESO PEEL MELANIN to the whole area with a soft fan shaped brush and leave it on the skin according to application instructions for each area.

STEP IV

Meso Peel Stop

(mono ingredient or cocktail)
• Neutralizing
• ph 8.7
Actives: Baking soda, Aloe vera, Bisabolol
Netraulizes the action of chemical peels, rebalancing the skin

STEP V

Reparation

Post-peel hydrogel patch mask (MESO ANTI-AGE MASK)
Hydrogel Face Mask, easy and fast use (pre-cut). It's 3D reticular structures ensures hours of maximum adhesion to the skin. They are dampened with active ingredients specially selected for treatment of different types of skin. Soothing, moisturising the skin and does not cause irritation.

STEP VI

Final Procedure

moisterisingsun protection SPF50+ (MESO LIFT AND PROTECT)

MESO LIFT AND PROTECT is a photoprotector suitable for everyday use. Ideal for dry hyper-reactive skin, photodermatosis, photosensitivity.

MESO LIFT AND PROTECT is a multifunctional product. Besides the presence of effective sunscreens against UVB and UVA rays, the formula has been enriched with precious active ingredients, suitable to guarantee:

Protection against UV rays
Moisturization (SYN®-AKE, HYALURONIC ACID Low Molecular Weight (5-10 kDa), COLLOIDAL OATMEAL)
Soothing (Aloe Vera)

TIPS

Recommended maximum application times (minutes): The application in layers and the exposure time depend on the type of thickness, skin conditions and the desired therapeutic result.

Rinsing and Neutralization.

• Wash (with a gauze soaked in water) the treated area starting from the central area, continue with the cheeks and finish with the forehead.
• Apply the post-peel neutralizing solution to effectively neutralize the exfoliation and restore the skin's pH.

In the case in which a frost is noticed in an area, it is possible to anticipate the neutralization of the peeling in this area even if they allow the peeling to act in the rest of the application area.
